

Advanced Rider Assistant Supplementary Manual

Rear Disc Mounting all bikes without ABS (ARA-Dxx)

Secure the bike on a stand.

Remove the rear wheel.

Clean that part of the brake disc which will be in contact with the ARA disc.

Advanced Rider Assistant Supplementary Manual

Rear Disc Mounting all bikes without ABS (ARA-Dxx)

Mount the supplied ARA disc.

Use glue and position properly on the
brake disc.

Wait for the adhesive to solidify.

*(Consult product instructions for details on
drying times, 24 hours typical)*

Fold down the securing tabs properly.

Put the wheel back.

Tighten the bolts to the value specified in
the Service Manual. Use a torque wrench.

Next, install the ARA wheel sensor
(ARA-WSSR). This step is bike model
specific thus it's not covered in this
document.
